## Objective

Final-year MCA student with hands-on experience in full-stack development using Python, Flask, JavaScript, React.js, and Node.js. Built multiple AI-integrated web applications with MySQL and MongoDB databases. Proficient in REST APIs, Git, and responsive web design. Seeking Full Stack Developer Intern role.

## Education

|                                                                                                                                            |                           |
|--------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|
| <b>Master of Computer Applications (MCA),</b><br><i>Sri Venkateshwara College of Computer Applications and Management, Anna University</i> | 2024 – 2026<br>Coimbatore |
| <b>Bachelor of Computer Applications (BCA)   83.71%,</b><br><i>Government Arts &amp; Science College, Bharathiar University</i>            | 2021 – 2024<br>Gudalur    |

## Skills

**Languages & Core:** Python, JavaScript, TypeScript, SQL, C, C++, Data Structures & Algorithms

**Frontend:** React.js, HTML5, CSS3, Bootstrap, Responsive Design

**Backend & API:** Flask, Node.js, RESTful API Design

**Databases:** MySQL, MongoDB

**AI/ML:** Hugging Face, NLP, Scikit-learn

**Tools & DevOps:** GitHub, VS Code, Agile/Scrum

## Projects

### AI Fake News Detection Platform | React.js, Flask, Hugging Face, REST API

- Achieved 90% classification accuracy using fine-tuned transformer models • Designed REST APIs with Flask, delivering sub-800ms average response time
  - Built responsive React dashboard with real-time confidence score visualization
- GitHub: [github.com/sugumaran-nix/fake-news-detector](https://github.com/sugumaran-nix/fake-news-detector) 🔗

### Fake Job Posting Prediction using ml

- Built Flask web app with 4 ML classifiers (Logistic Regression, Random Forest, SVM, Naive Bayes) using TF-IDF to detect fraudulent job postings with explainable AI and URL fraud heuristics
- Developed REST API with model switching, SQLite prediction history, Docker deployment, and unit tests delivering sub-800ms response time
- GitHub: [github.com/sugumaran-nix/fake-job-posting-ml](https://github.com/sugumaran-nix/fake-job-posting-ml)

## Certifications

- Web Development Fundamentals | IBM SkillsBuild
- Introduction to Generative AI | Google Cloud
- Prompt Engineering for Everyone | CognitiveClass.ai (IBM)
- SQL (Basic) | HackerRank

## Soft skills & languages

**Soft Skills:** Problem Solving, Critical Thinking, Adaptability, Attention to Detail, Time Management, Conflict Resolution

**Languages:** Tamil (Fluent), English (Intermediate)
